Hello,

Many of you are aware of the tremendous corruption and civil rights violations that exist in our judicial branch of government. It has become factual knowledge that the Family court system has become a place of business to extort money and property by promoting homelessness, impoverishment of abused women and children. Child Protective Services has become a billion dollar industry with the warehousing of children, child kidnappings with adoptions, abuse and the silencing of children with drugs that pharmaceutical companies promote. Children are the greatest casualties in this big business industry. As a society, we are witnessing the increase of homeless teens that have turned to the streets to escape the system of CPS or to escape from being placed with an abusive parent. *The domino affect begins with the judicial government and ends with the children. The cause of the extortion of children is pointing straight to the judicial and sovereign immunity, misuse of federal and State funds, abuse of discretionary powers, and influence of political and financial campaign contributions.*

We seek to unite with other individuals, organizations and agencies seeking reform. Please join us in campaigning for reform and restructuring branches of government that have added to the injuries of battered mothers, children and families.

Thank You,

Jane Boyer, President
